What we owe the well-intentioned Nuts: The WxPost, which consulted me on Skolnick and in a couple of good stories made all who question look like him, has just asked me how to find and speak to Mae Brus sel. What they are interested in from her Realist (ugh!) pit is factually and logically impossible. This is true of each aspect, even names, her particular corruption of what is easily pinpointed on plans for bugging Demo. convention. Even the architect she names is not. If we had only enemies!
